### EXTRA THIN WALLED

Thin-walled shape and 110mm length gives extra reach for nuts recessed deep inside the wheel. They are ideal for aluminum wheel nuts where access to nut is very tight. Color coded shafts make size identification easy.

### MARKING ← Model Change

The socket size and Ko-ken mark printed on the shaft makes it easier to see if the socket is still rotating or stopped.

### PLASTIC PROTECTOR ← Model Change

A detachable plastic protector is fitted to the socket to prevent damage to the wheel when working in tight areas.
